

Dear customer,

Thank you for your purchase of Skylink model **TS-101A**. The red button on the model **TS-101A** is for programming purpose. It will take about 1 hour to resume its function after pressed. If you want to test the **TS-101A** after programming, please set the temperature limits (HI & LO) to your preset range, then hook up the external probe and dip the probe to hot or cold water to test.

If you have any questions or difficult getting your temperature sensor to work, don't hesitate to contact our Customer Service via e-mail at [support@skylinkhome.com](mailto:support@skylinkhome.com) or call our toll free at 1-800-304-1187 from Monday to Friday, 9 am to 5 pm EST or Fax (800) 286-132.

Thank you for your business,

Skylink Technologies Inc.,
