

## **Skylink wireless alarm system SC-1001 now available at Fry's Electronics**

**(Brampton, ONTARIO, Canada)** May 22, 2010 – The Wireless Alarm System SC-1001, designed and manufactured by the Skylink Group - a leader in wireless technology is now available at Fry's Electronics - a big-box store and retailer of software, consumer electronics, computer hardware and household appliances with a chain of superstores in US.

"The selling of Skylink Wireless Alarm System by Fry's extends the popularity of this successful product line," said Philip Tsui - CEO of Skylink Technologies Inc., "it provides homeowners with a total security package that is expandable and can easily be customized, and allows the homeowner to monitor the security of their home regardless of whether they are home or away."

The wireless security system kit SC-1001 sold at Fry's can be installed in minutes. With the motion sensor and two door/window sensors, the system covers enough area for a decent sized house. By adding the additional sensors, you can expand the system to monitor more locations in a home, business office, 24-hour store, etc., or wherever security is a concern. The emergency dialer is your own monitoring center without any monthly charges. The Control Panel can control up to 30 different sensors, these sensors include door/window sensor, motion sensor, flood sensor, smoke sensor, temperature sensor, etc. If any of these sensors are triggered when the system is armed, the siren will sound and it will send a wireless signal to the dialer that will call for help at the same time. You can program the emergency dialer to call up to 9 different phone numbers including your own cellular phone, pager, your doctor, relatives, friends, neighbors, etc. Once the recipient picks up the phone, the emergency dialer will play your pre-recorded message and inform the recipient that you are in an emergency situation and to send help right away.

The system SC-1001 (Clam shell pack, SC-1000 is gift box pack) accessories: Audio Alarm (AA-433), Remote Keychain Transmitter (4B-434), Motion Sensor (PS -434A) and Door/Window Sensor (WT -433) are also available at Fry's Electronics.
